5,560 C-Level and One Step Below Surveyed
Leadership Vacancies Increase

A recent study by the Corporate Leadership Council found that 72% of companies predict they’ll have an increasing number of leadership vacancies over the next three to five years. At the same time, 76% are “less than confident” in their abilities to adequately staff these positions.

Where will the leaders come from to fill the vacancies?
$55B Spent World Wide; The results…

Of leaders rate the quality of their organization’s development programs high or very high: 37%

The overwhelming majority of leaders say they are not satisfied with their organization’s development offerings: 63%

Bench strength and “Ready Now” leaders has dropped almost 19% from 2011 to 2016

Medidata
A Fast-Growing Leader in Clinical Technology with Ambitious Revenue Goals Deploys a Scalable Leadership Development Solution to Successfully and Cost-Effectively, Build its Leadership Capabilities. With the Primary Goal of Business Impact and Market Expansion and Quality.
Medidata is a fast-growing company in the development of life sciences that offers a unique cloud platform dedicated to transforming clinical research. Medidata’s solution enables its clients to cut clinical development costs, mitigate development risks and deliver drugs and devices to market faster.

Medidata’s clients include more than 90% of the top 25 global pharmaceutical companies; biotech, medical device and diagnostic companies, academic and government institutions, and contract research organizations (CROs). Its Clinical Cloud currently encompasses eight billion clinical records from more than two million patients across more than 12,000 studies, 9,000 trials and more than 500,000 data points are added daily.
The Challenge

• Medidata had been growing at 20% annually and had set a long term goal of reaching $1 billion in revenue.

• Very few of Medidata’s leaders had significant experience managing a fast-growing company that is targeting an ambitious revenue goal.

• HR’s mandate was to improve leadership acumen throughout the organization quickly, efficiently and uniformly.

• 200+ Leaders in 2.5 years, tie development back to business impact
High Impact Development Needed to Happen Globally

With Leaders Spread Throughout the US and Globally – Medidata Needed
A Solution that Could Provide a Unique Customized Approach – while Ensuring a Consistent User Experience with the Ability to Deliver Real-Time Reporting, Measurable Results and Business Impact
The Approach

1. **Assess**

To ensure alignment and organizational success, Skyline Group worked with Medidata to gather business objectives and key performance indicators (KPIs); leadership competency gaps the organization needs to fill; expected outcomes; and environment and context considerations.

Skyline then worked with Medidata to determine the optimal way to deploy the leadership development experience at individual, cohort and organization levels.
The Approach

2. Prioritizing Individual Development Objectives

Once the implementation was underway, Skyline Group deployed its Competency-Driven Leadership Development model, C4X to assess Medidata’s leaders on 28 competencies using the 360-degree assessment tool that is part of the technology platform.

Based on the results of each participant’s 360, the coach, leader and the leader’s manager identified three competencies for development and the related goals that further the company’s current objectives.
3. Applying New Learning

C4X was then configured to support the leader in achieving these goals using an on-the-job learning model. It provided individually tailored development roadmaps whereby new content is opened up weekly and can then be accessed online at any time. Individual based learning bites are pushed out. In addition, the leader worked one-on-one with an executive coach who supported the learning process and helped him or her apply this knowledge in his or her work life.

Leaders met with their coaches and completed weekly assignments including articles, case studies and videos, with their progress monitored by their coaches on the C4X platform. C4X’s real-time dashboard also enabled HR leaders to see which users have embraced the program.
4. Measuring Individual, Team and Business Results

As a digital platform, C4X allows multiple streams of data to be tracked, synthesized and presented to authorized HR administrators. Administrators can easily understand not only the impact of the program on individuals and cohorts, but also identify skills gaps, as well as strengths and opportunities within the company as a whole.

Gathers participant data pre, mid and post program, throughout the development process to measure improvements and transformations in the competencies leaders have been developing.
"The quality of the program is excellent, the tools are great, and the coaches are first-rate. C4X has enabled us to have more than 200 leaders coached in a cost-effective way at a cost per-leader far lower than traditional coaching.

We’ve experienced a substantial return on investment by implementing C4X compared to what we have spent on it."

– Eileen Schloss, EVP of Human Resources at Medidata
(retired February 2017)
High Impact and Sustainable Transformation

Leveraging the unique scalability and cost effectiveness of C4X, more than 200 leaders were developed and coached over a 24 month period.

Participants estimated that the leadership growth they experienced and have applied in their jobs has been worth an average of $432,000 per leader. Or $86M

Medidata reports a 99% satisfaction rating among the leaders who participated.

In addition to the direct ROI, Medidata has seen improved job satisfaction and retention among scores of leaders, who report feeling valued and impressed that the company was willing to invest in their careers.
Medidata Solutions, Inc. (MDSO) saw EPS growth of 76.3% last year, and is looking great for this year too.
C4X Coaching for Excellence

Our integrated 1:1 coaching and technology solution, C4X increases performance at each stage of the leadership career cycle.
